

Interested in learning AWS and infrastructure automation and boosting your career?

This **AWS + Terraform** training is designed to equip you with the skills needed to excel in the cloud industry. Led by **Mr. Akesh Reddy**, an [AWS Certified DevOps Engineer Professional](#) with 7+ years of industry experience, this course starts with networking concepts required to understand AWS and covers all major AWS services you need to confidently work with AWS in real-world projects, Terraform for Infrastructure as Code (IaC), best practices, real-world scenarios, hands-on labs and 2 mock interviews. Upon completing this course, you'll clearly understand how modern organizations leverage AWS to deploy, manage, and scale their web applications and workloads.

Course Plan

Course	AWS + Terraform + 2 mock interviews
Start Date	05-Jan-2026 (Monday)
Timings	6:00 AM - 7:15 AM (Mon - Fri)
Duration	10 weeks (50 classes)
Course Fee	30,000/- Two installments (15,000 x 2)
Format	Online via Zoom platform
Recordings	Shared via Vimeo platform (one year validity)
Contact Number/Whatsapp	7981458707
Zoom Link (First 3 classes are free) If Zoom Link does not work use Meeting ID and Passcode	https://us05web.zoom.us/j/84413270508?pwd=vrxQ18FNLdUETIAv1ZG9broqud7zCt.1 Meeting ID: 844 1327 0508 Passcode: join-aws

Course Outline

Introduction

- Why do we need a public cloud?
- AWS account creation & Intro to AWS Management Console.
- Network concepts required to understand AWS.

Networking Services

- AWS VPC (Virtual Private Cloud)
- Subnets
- Route Tables
- Internet Gateway
- Security Groups
- VPC Peering
- NAT Gateway
- Network Access Control List
- VPC flow logs and endpoints
- Virtual Private Network

Compute Services

- EC2 (Elastic Compute Cloud)
- ELB (Elastic Load Balancer)
- Auto Scaling

Storage Services

- EBS (Elastic Block Storage)
- S3 (Simple Storage Service)
- Storage Gateway

Database Services

- RDS (Relational Database Service)
- DynamoDB (NoSQL Database)
- Redshift (Data Warehouse solution)

Monitoring Services

- Cloudwatch
- CloudTrail

Identity Services

- IAM (Identity and Access Management)

DNS & CDN Services

- Route53
- CloudFront

Certificates & Secrets

- AWS Certificate Manager
- AWS Secrets Manager

DevOps Services

- CloudFormation
- AWS Developer Tools

Terraform

- Terraform Introduction
- Terraform providers (AWS)
- Terraform Init, Validate, Plan, Apply, Destroy.
- Terraform state and remote state file.
- Terraform variables, modules, workspaces.

Mock Interviews

- Two rounds of mock interviews
- Resume review
- Interview feedback
